TFL Natural Deduction with Biconditionals Exercise PHI 154 (Eliot) Fall 2020

For each argument, construct a proof using the natural deduction system described in Chapter 16. The premises are separated by commas, and the conclusion comes after the "therefore" symbol, which is ":" (as introduced on page 2). The inference rules we have learned at this point are R, $\wedge I$, $\wedge E$, $\rightarrow I$, $\rightarrow E$, $\leftrightarrow I$, $\leftrightarrow E$.

1.
$$P \leftrightarrow N, (P \leftrightarrow U) \land N : N \land P$$

2.
$$V \rightarrow X, V \leftrightarrow E : E \rightarrow X$$

3.
$$L \wedge O, F \leftrightarrow (O \wedge L), F \leftrightarrow (T \wedge Z) : T \wedge Z$$

4.
$$C \leftrightarrow R, P \leftrightarrow T : (C \land T) \rightarrow (R \land P)$$

5.
$$\neg R \leftrightarrow H, \neg R \land \neg D, \neg D \leftrightarrow L : L \land H$$

6.
$$B \to P, (\neg M \land P) \to C, (B \to P) \leftrightarrow P, \neg M : C$$

7.
$$S, Y : Y \leftrightarrow S$$

8.
$$F \to Q, Q \to (G \land F) : Q \leftrightarrow F$$

Some additional, completely optional, relatively easy proofs

9.
$$J \leftrightarrow K, K \leftrightarrow L, L \leftrightarrow M, J : M \land J$$

10.
$$Y \vee Z, \neg E \leftrightarrow (Y \vee Z) :: B \rightarrow \neg E$$

11.
$$C \leftrightarrow F, M : F \leftrightarrow (M \land C)$$

12.
$$\therefore P \leftrightarrow P^*$$

Some additional, completely optional, slightly more challenging proofs

13.
$$U \leftrightarrow (G \land \neg M), C \rightarrow \neg M, (C \land Y) \land G : U$$

14.
$$M \leftrightarrow (O \leftrightarrow I), Z \land I : O \rightarrow M$$

15. :
$$[(P \to Q) \land (Q \to P)] \leftrightarrow (P \leftrightarrow Q)^*$$

^{*} prove from no premises
